

NetZeroPlanner

Empowering your City to Plan, Prioritise, and Fund your Path to Net Zero

NetZeroPlanner is a powerful data-driven decision making tool that empowers city leaders to assess the impact of their Climate Action Plan and refine their roadmap to ensure they meet decarbonisation goals. Using local data inputs and performance tracking, it provides evidence-based insights to make informed climate action and investment decisions.

By supporting cities in evaluating the costs, benefits, and return on investment across various sectors, it enables city leaders to prioritise actions that maximise carbon reductions and financial returns including co-benefits.

The tool aims to be a dynamic part of a city's planning process. Cities can monitor their progress through performance reports and scenario analysis, adjusting plans as needed to stay on track to net zero success.

Start transforming your city's decarbonisation strategy today with NetZeroPlanner!

This tool is free and available to all city users of the NetZeroCities

Features of NZPlanner

GET A CUSTOMISED DECARBONISATION ROADMAP FOR YOUR CITY:

Based on your city data and strategic plans, NetZeroPlanner generates a customised roadmap for your city's journey to climate neutrality.

EXPLORE MULTIPLE PATHWAYS TO NET-ZERO WITH SCENARIO PLANNING:

NetZeroPlanner enables cities to test "what-if" scenarios, giving them the flexibility to explore different strategies and ambition levels. What's the most impactful sector for your city? NetZeroPlanner breaks down decarbonisation into 13 sub-sectors, to help your city target high-impact areas and reach climate neutrality faster! It covers primarily Scope 1 and 2 emissions to provide a comprehensive view of your city's carbon footprint.

MONITOR CITY'S PROGRESS TO STAY ON TRACK WITH NET-ZERO GOALS:

The tool enables cities to use annual performance reports to assess progress and make the needed adjustments to their Climate Action Plans.

MAXIMISE RETURNS ON CLIMATE ACTIONS:

- **Optimise resource allocation:** By evaluating the costs and benefits across different sectors, the tool helps cities prioritise actions that maximise both carbon reductions and financial returns, ensuring efficient use of limited resources.
- **Assess Co-Benefits for Communities:** Invest in climate solutions that not only reduce emissions but also enhance public health! NetZeroPlanner reveals the often-overlooked value of decarbonisation by monetising benefits such as cleaner air.
