BABLE Solutions: Smart Cities, EUROPE

A digital tool to invest in Electric vehicles

To provide effective electric vehicles and charging stations for cities, the BABLE project created their Investment package for Smart Cities (ISC) tool, which offers cities an innovative financing instrument that simplifies the process in looking to implement sustainable and smart urban solutions. The scheme will initially focus on urban electric fleet procurement and financing. The ultimate goal is to develop a digital tool that will coordinate investment solutions by screening the market for suppliers of EVs and related infrastructure, coordinating options for packaged solution bundles, providing support in acquiring capital/financing and closing the transactions.

The BABLE financing scheme

The Investment Package for Smart Cities

- BABLE organises a joint procurement between several municipalities and fleet owners. The Investment package for Smart Cities (ISC) demand helps achieve a discount on investment costs by unlocking the scale advantage of joint procurement. The costs per vehicle come down when the scale is achieved.
- By applying service contract models and working with external investors eases pressure on the city's capital budget
