Community of Practice

What is a Community of Practice?

A community of practice (CoP) is a space gathering city officials, experts, and stakeholders from all sectors—energy, mobility, circular economy, construction—to accelerate climate action. Community members engage in learning and collaborating to enhance their knowledge and skills in that area.

Purpose

- Knowledge Sharing and learning
- Peer-to-peer exchange through engagement & collaboration
- Support for Climate Neutrality Goals

How

Many communities of practice rely on face-to-face meetings as well as web-based collaborative environments to communicate, connect and conduct community activities.

SOCIAL INNOVATION

People-based solutions for climate neutrality in cities

What is Social Innovation about?

Social Innovation is *not* Social Impact *or* Social Entrepreneurship.

...is about changing how society works.
...is about getting people to act **NOW** – changing social practices.
...is systemic.

Is about the end result (e.g. how many lives were impacted by an initiative or program).

Is about new forms of value creation based on social and economic principles. Social impact is the final goal of social enterprises and profit is essential towards guaranteeing continuous social impact.

What is Social Innovation?

Fosters inclusive and collaborative approaches to tackling climate challenges, making solutions more effective and rooted in community needs. It is a **bottom-up, collaborative, systemic and human-centered approach to innovation**. In short, it is social in its means and its ends.

Fostering Collective Action

Invites citizens to actively contribute to the mission through lifestyle changes, participation, entrepreneurship

Building Active Community Structures

Creating new structures for communities to act positively for the climate and together (e.g. energy communities)

Collective sense of agency

Creating a more collective vision to development and ways of being/living

Inclusion and Diversity

Reflects demographic diversity and addresses the needs of underrepresented or vulnerable groups.

Meets Social Needs and Overall Wellbeing

Innovations that satisfy "real" unmet needs of society, considering the economic development and overall wellbeing of people and planet at every step

Increased capacity to act

Building new skills and knowledge that allow for broader participation

Improved Policy Quality

Incorporates diverse perspectives and evidence, leading to more effective, transparent, and responsive policies.

Creates new relationships

Engages different actors in new relationships giving space for new collaboration and further innovation and a more vibrant ecosystem

Social Cohesion

Enhances trust in democracy and combats disinformation, fostering unity and civic engagement.

Social Innovation is about...

... creating collective sense of agency

City Labs

Social Innovation is about...

... creating new relationships and increasing the capacity to act

Municipalities as platforms for collective urban action - participatory budgeting

Social Innovation is about...

... fostering collective action

Climate Labels

The screenshot shows the homepage of the Ilmastoannos website. The header is orange with the Ilmastoannos logo and navigation links: Home, Climate Meal Campaign 2021, News, Contact us, and Suomeksi. The main content area features a large blue icon of a fork inside a cloud, next to the text '0,1 kg CO₂e'. To the right, the heading reads 'Serve climate-friendly meals to your customers'. Below this, a paragraph explains that the Climate Meal label helps restaurant customers identify meals with a smaller-than-average carbon footprint, specifically mentioning that the total carbon footprint of all ingredients does not exceed 1.0 kg CO₂e. A blue button at the bottom right says 'Sign up and start serving Climate Meals →'. On the right side of the page, there are logos for the European Union (Euroopan unioni), the Finnish National Growth Programme (Vipuvoimaa EU:lta 2014-2020), and the Uudenmaan liitto (Uudenmaan liitto / Nylands förbund).

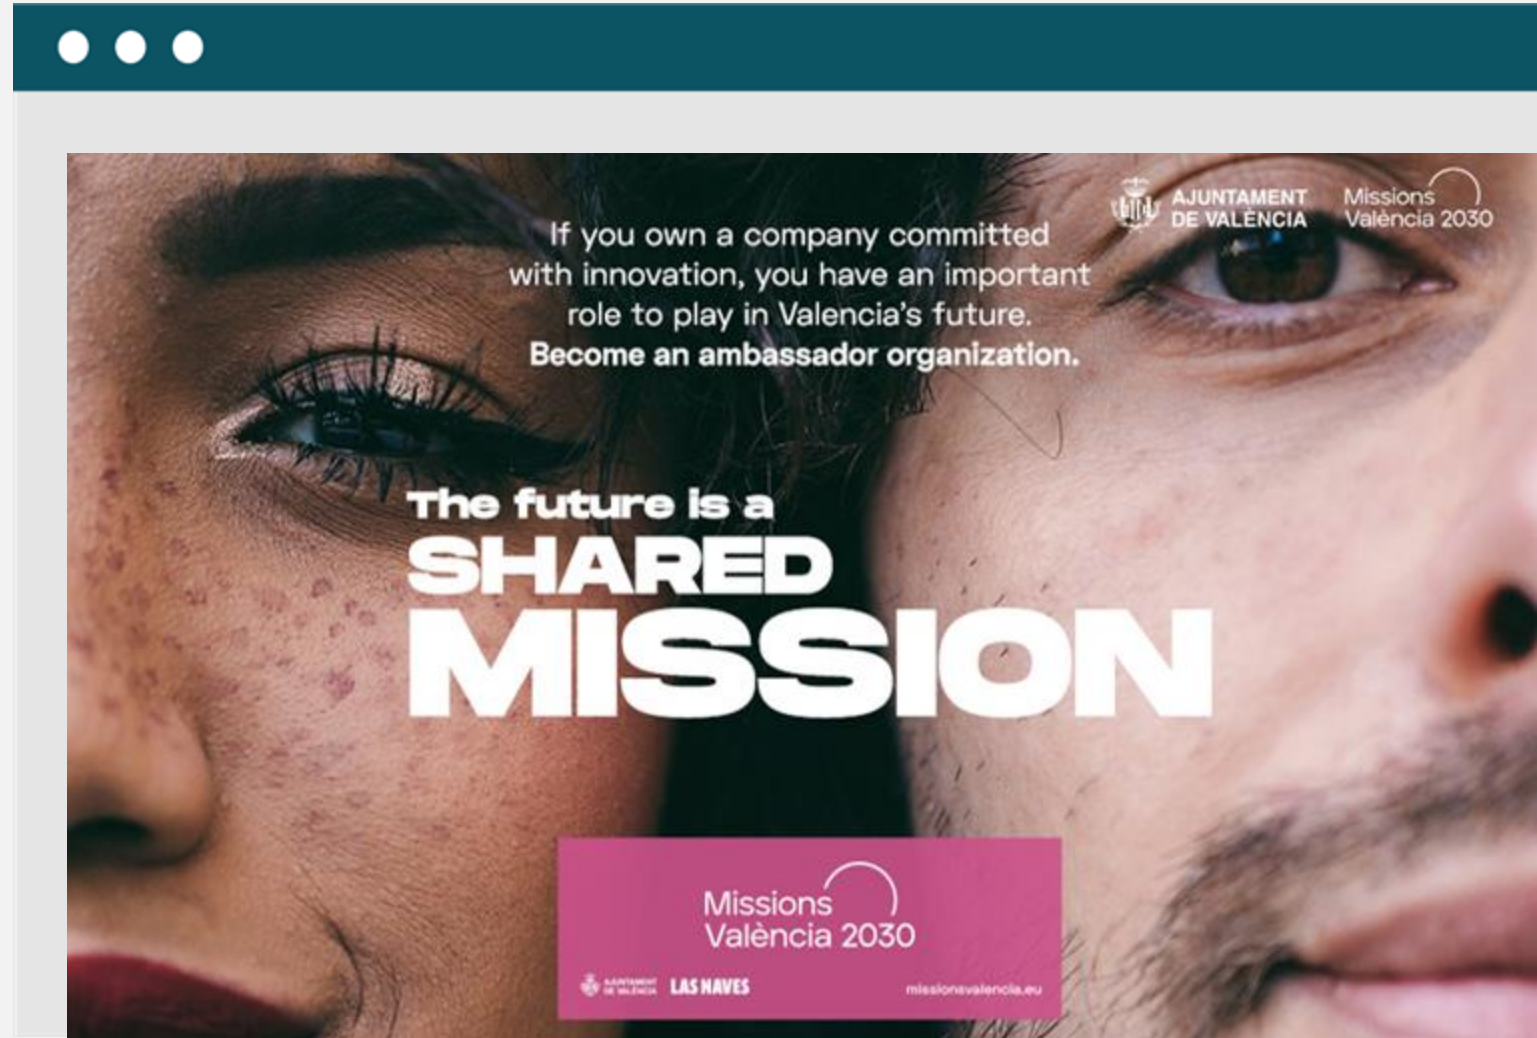

Social Innovation is about...

BLAU (JUSTÍCIA CLIMÀTICA/EQUITAT/EDUCACIÓ/COMUNICACIÓ)	LILA (DADES OBJECTIVES)
TARONJA (PUNTS NEGATius)	GROC (PUNTS POSITius)

OPORTUNITATS

Overview of the Barcelona Citizen's Assembly

- 100 people chosen by lottery.
 - From 16 to 75
- Held between September and December 2022
- 10 sessions and four phases
 - Preparation Phase
 - Information and Capacitation Phase
 - Deliveration phase
 - Voting phase
- Results:
 - 34 concrete and argued recommendations with actions to develop them within the framework of the 3 areas

Energy

Mobility

Consumption and
waste management

Positive outcomes and lessons

- Direct evaluation of the effectiveness of the strategies and instruments used to raise awareness of the seriousness of the socio-environmental crisis in civilizans
- Estimation of the degree of perception of the seriousness of the climate problem by citizens.
- Detection of what needs the population has in order to make systemic and behavioral changes.
- Take into action collaborative processes involving citizens all around the city and using their main ideas and concerns rearding climate change to cocreate a portfolio of action sent to the municipality.

Co-creation model and toolbox supporting smart and sustainable urban development

Social Innovation:

People-based solutions for climate neutrality in cities

13 February, 2025

Elina Wanne

Development Manager. Sustainable Energy - City of Espoo

The Espoo Story

The Sustainable Espoo Programme

Goals

- 

1. Espoo will be a pioneer in implementing the UN Sustainable Development Goals
- 

2. Espoo will achieve carbon neutrality by 2030
- 

3. The Espoo community and residents will act sustainably
- 

4. Espoo will be a model city of sustainable urban development
- 

5. Espoo is the best development partner for sustainable and smart urban solutions

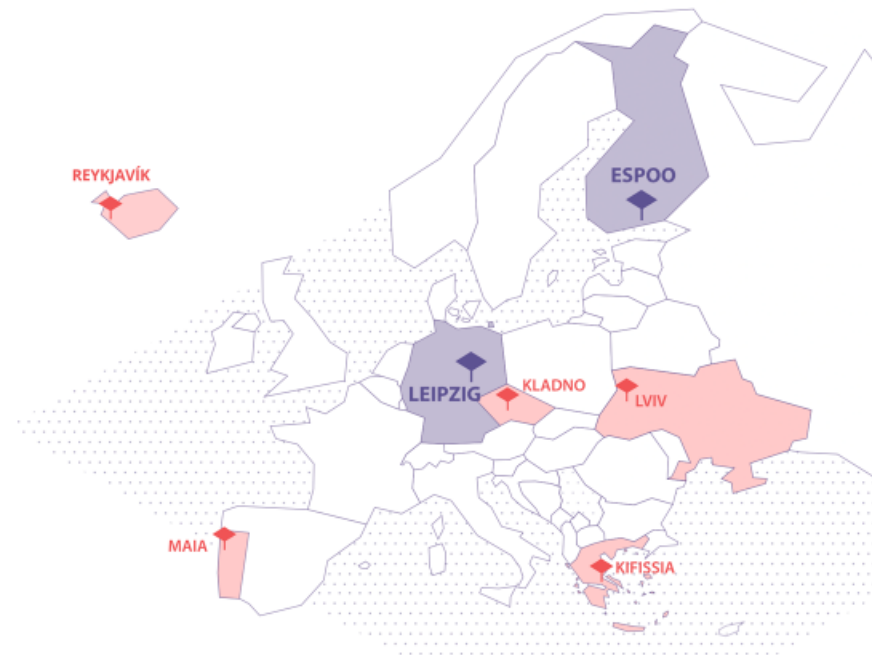

Development entities

- Mobility and transport
- Energy systems
- Circular economy and sustainable living
- Sustainable land use and construction
- Nearby nature and biodiversity

Horizon 2020 SPARCS (2019-2024) project

- ▶ International research and innovation project on smart city topics
- ▶ +30 partners, 2 *Lighthouse* and *Fellow* cities
- ▶ Development of future **positive energy districts** (PEDs)
 - ▶ “Districts where more sustainable energy is produced than consumed.”
- ▶ Focus on urban transformation towards zero carbon solutions:
 - ▶ Local energy systems, RES solutions, energy management
 - ▶ Sustainable mobility, e-mobility and charging solutions, travel behavior
 - ▶ Citizen engagement, human-centric solutions
- ▶ Supports Espoo’s strategic aims to be carbon neutral by the 2030 and reach SDGs by 2025
- ▶ Collaboration between the city and private companies on the demo sites

Co-creation model for sustainable and smart urban area – starting point

- ▶ **Challenge:** How to co-develop urban areas and urban solutions together with different stakeholders?
 - ▶ Moving from building-perspective towards an area-perspective
 - ▶ Setting shared visions and targets for sustainability and integrate smart solutions together with different stakeholders for shared benefit and optimization locally
- ▶ **Perspective:** urban area is a set of systems where different solutions and elements form a larger whole (e.g. Positive Energy Districts, PEDS)

Picture 1. Positive Energy District (PED)

Kera area as an innovator in co-creation

- ▶ Currently a brownfield area (old logistics area) which will be turned into a new urban district with 14.000 residents and 10.000 jobs
- ▶ The new Kera will be built sustainably according to the principles of the circular economy, emphasizing carbon-neutral solutions
- ▶ Transformation from an old industrial area to a new city district enables experimentation with sustainable solutions and a new kind of cooperation, where the city is built together from the beginning. Kera is an opportunity for cooperation, learning and growth at the forefront of future urban development
 - ▶ Kera Development Commitment

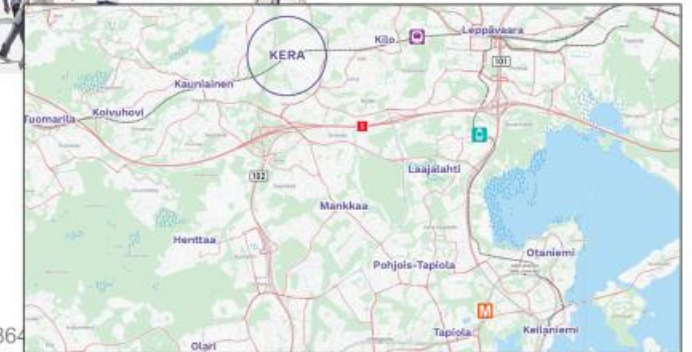

2015

2020

2030+

Co-creation model for sustainable and smart urban area

- ▶ **The result:** a virtual **toolkit** for sustainable and smart urban areas.
 - ▶ Source of inspiration and practical tools and methods, not a rigid model or pre-defined format
- ▶ Toolkit is divided into six themes that are key to the regional co-creation process
- ▶ It describes the process, methods and practices that support the development of sustainable and smart urban areas and the implementation of urban solutions at regional level in cooperation with different stakeholders
- ▶ The model is applicable to all urban areas and urban systems identified for development
- ▶ Openly available for anyone to utilize.

www.co-creatingsparcs.fi/en

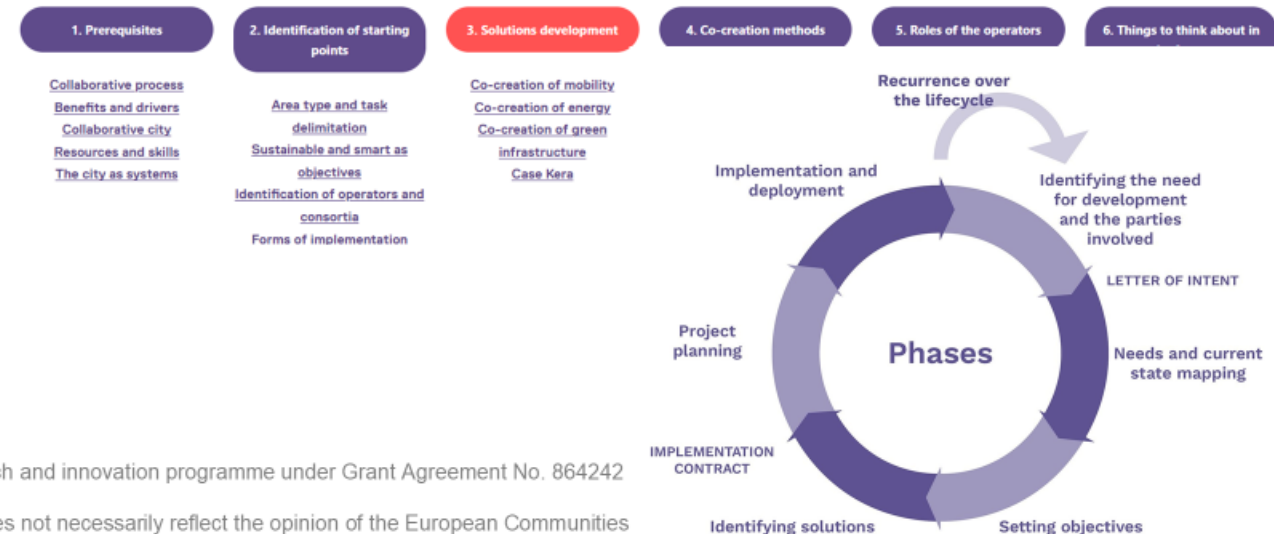

Front page Co-creation model toolkit Info In Finnish/Suomeksi

Co-creation model Toolkit

For Sustainable and Smart Urban Areas

Instructions

We have divided the toolkit into six themes that are key to the regional co-creation process. The section **Prerequisites** will introduce you to the process of developing a sustainable and smart city, its benefits and prerequisites. The section **Identification of starting points** describes issues that are important in the preparatory phase of co-creation more tangibly. The section **Solutions development** unfolds the co-creation process, especially in creating sustainable mobility and energy communities, as well as valuable **co-creation** experiences from the City of Espoo's Kera area. Finally, we will present **methods and roles**, and explore the possibilities for co-creation further.

Participatory budgeting in the city of Dubrovnik

February 2025.

Grad Dubrovnik

DURA

Dubrovačka razvojna agencija
Dubrovnik Development Agency

- Dubrovnik Development Agency Ltd. – DURA, is a professional, non-profit organization that was established by the City of Dubrovnik in 2007 with the primary aim to prepare and implement EU-funded projects
- DURA is 100% owned by the City of Dubrovnik
- Currently there are 17 professionals employed full time
- DURA represents a union between the City and other institutions and organizations relevant to sustainable local development

- Technical support in the preparation of EU-funded projects
- Preparation of nationally-funded project proposals
- Management and coordination of projects
- Support for entrepreneurs
- Support for NGOs
- Education
- Preparation and drafting of strategic documents for public entities

- Dubrovnik Development Agency DURA is the coordinator and operational implementer of the Participatory Budgeting (PB) project, a democratic tool through which decisions on the allocation of part of public funds are made in direct cooperation with citizens
- In 2023 and 2024 project was implemented at the level of 25 Local Units of the City of Dubrovnik

- Participatory Budgeting (PB) Project is implemented in the City of Dubrovnik in 2023 and 2024
- Citizens through the workshops are presenting proposals that aim to improve the quality of life of the community of the city district/local city councils to which the citizen belongs
- Each proposal must be described concretely and objectively
- After the workshops the proposals are sent to the Commission for a technical check
- Citizens vote by districts or local city council via the VOXPOPULI online platform available on the website of the City of Dubrovnik

8 CITY DISTRICTS – EUR 120,000.00 per each district

17 LOCAL CITY COUNCILS - EUR 60,000.00 for each council

The projects **that were voted as winners** in the first year of implementation (2023) are scheduled for completion by the end of 2024. Below is an overview of some of them:

project proposal number

project proposal title

project proposal description

0123 – 0139 - **Traffic Connectivity – Neboderko Minibus** - The project proposes the purchase of a minibus/van that would serve to transport residents from the Gruž high-rise buildings area (Janka Bobetka Street and Od Gaja Street), connecting this part of the city with Andrije Hebranga Street and the marketplace in Gruž. The goal is to facilitate movement for residents, a significant portion of whom are elderly.
PROJECT STATUS INFO – Completed so far: The project will be fully operational by the beginning of March 2024.
RESPONSIBLE DEPARTMENT: Department for Communal Affairs, Traffic, and Local Government.

project proposal status

City of Dubrovnik department responsible for project implementation

On our website *For the Better City!*, you can find information about all the projects that have been proposed and approved as part of the Participatory Budgeting in city districts and councils.

0224 – Public Lighting on the Section from the Highway to the Beach – The project proposes the development of the section from the highway to the beach in Brsečine (Kriva Ulica, Put uz Progon). This would involve mowing and landscaping the street, pouring concrete bases for the installation of lighting poles, and installing solar-powered lighting poles along the section, up to the approved financial limit.

PROJECT STATUS INFO – Completed so far: The project has been completed, with the pedestrian path to the sea in Brsečine illuminated and landscaped.

RESPONSIBLE DEPARTMENT: Department for Communal Affairs, Traffic, and Local Government.

Osvjetljena pješačka staza do mora u Brsečinama

3. srpnja 2024.

Realiziran je još jedan projekt participativnog budžetiranja, završeni su radovi na uređenju i osvjetljenju pješačke staze

Kreće obnova kamenog pješačkog puta do Bosanke

9. listopada 2024.

Radovi počinju ovog tjedna i odvijat će se do kraja godine, a obuhvaćaju pažljivu demontažu postojeće kamene staze i izradu nove u duljini od 150 metara najkritičnije dionice puta. Realizaciju projekta vodi Upravni odjel za komunalne djelatnosti, promet, more i mjesnu samoupravu.

[Pročitaj više »](#)

Source: Za bolji Grad

0012 – Reconstruction of the Pedestrian Path "Put od Bosanke" – The project proposes the reconstruction of the pedestrian path "Put od Bosanke," which connects Bosanka to the Adriatic Highway, specifically the underpass on the highway, due to its deterioration and damage. The most damaged section of the path, the stone steps, is located in Bosanka. The plan is to level and grout them to improve safety for local residents and tourists who frequently use this walkway. **PROJECT STATUS INFO** – Completed so far: Work has begun and will continue until the end of the year. The works include the careful dismantling of the existing stone path and the construction of a new path over a 150-meter stretch of the most critical section. Based on the expressed wishes of the residents of Bosanka, the reconstruction will restore the stone pedestrian path that connects the settlement to the D8 state road, Srđ Station, and the underpass, which requires renovation due to its condition.

RESPONSIBLE DEPARTMENT: Department for Communal Affairs, Traffic, and Local Government.

0263 – **Children’s Playground in Ploče District** (Project Documentation) – The project proposes the development of project documentation for the construction of a children's playground on Bruna Bušića Street. This would include a topographic survey, cost estimation, and other necessary documentation. The playground construction would involve equipping the area with play structures such as climbing frames, slides, swings, roundabouts, etc., as well as installing protective fencing, benches, and lighting.

PROJECT STATUS INFO – Completed so far: The plot has been cleared and surveyed. The development of the main project is ongoing, with delivery and partial implementation planned according to the available funds for this year.

RESPONSIBLE DEPARTMENT: Department for Construction and Project Management.

Source: DuList

Source: Grad Dubrovnik

Source: Grad Dubrovnik

0192 – **Water Reservoir Kalac and Goveđarica** – Work has begun on the renovation and redevelopment of the Kalac water reservoir, located in the Kliševo local committee area. The selected project plans for the complete restoration and adaptation of the reservoir, including all necessary infrastructure, access, and surrounding environment.

PROJECT STATUS INFO – Completed so far: Renovation work has begun

RESPONSIBLE DEPARTMENT: Department for Construction and Project Management.

CRITERIA FOR PROJECT PROPOSALS

Acceptability criteria of the project proposal:

1. The project proposal is under the jurisdiction of the City of Dubrovnik.
2. The project proposal is within the given financial framework for the individual project (including VAT).
3. The realization of the project proposal is feasible in a period of 12 months, in one budget year from 01.01.2025. until 31.12.2025. (including public procurement).
4. Projects exclusively contribute to the general interest of the community
5. The project proposal is in accordance with the development strategies and priorities of the City of Dubrovnik.
6. The project proposal is not a religious or politic nature.
7. The project proposal can not consist of several different thematic units, but must be conceived as a well-rounded, concrete project/unit.
8. The project needs approval of the technical commission of a certain administrative department.

- Successfully implementing project in cooperation with professors and coordinators
- Sixth grade students from seven Dubrovnik primary schools each year participate in project
- Students can choose one project per school through the processes of proposals, campaigns and voting
- Having financial resources at their disposal, students can buy, repair or organize something in their school

Leaflet for homework - Participatory budgeting in primary schools

ZA RODITELJE

Poštovani roditelji,

Dubrovačka razvojna agencija DURA d.o.o. već četvrtu godinu zaredom u suradnji s Gradom Dubrovnikom uspješno provodi projekt Participativno budžetiranje u dubrovačkim osnovnim školama. Projekt se provodi u školskoj godini 2023/2024 u sedam osnovnih škola: Ivan Cundulić, Lapad, Montovljerna, Marin Držić, Marin Četaldić, Mokošica i Antun Masić. Učenici kroz proces predlaganja i glasovanja biraju jedan projekt po školi u vrijednosti od 2.700,00 € bez PDV-a. Svi projekti uspješno se realiziraju kroz suradnju učenika predlagatelja, škola, Grada Dubrovnika i DURA-e.

Ovim projektom učenici se uključuju u proces donošenja odluka o raspodjeli dijela javnih sredstava u njihovim školama te ih na takav način učimo da mogu i trebaju biti dio demokratskog procesa odlučivanja.

Prošle su godine u procesu participativnog budžetiranja sudjelovala 403 učenika i učenica šestih razreda svih sedam gradskih osnovnih škola i svojim su školama donijeli vrijedne projekte, učinivši škole boljim i ugodnijim mjestom za svu djecu.

Ove godine učenici će ponovno imati priliku predstaviti svoje ideje koje su osmislili kao domaći zadatak. Iz svakog razreda proizaći će po jedna ideja, koja će biti popraćena kampanjom, a potom će uslijediti finalno glasovanje za jednu pobjedničku ideju po školi i ta će se ideja realizirati u ovoj školskoj godini.

Molimo Vas da podržite svoje dijete u sudjelovanju, jer možda upravo njegova ideja bude realizirana i donese dobrobit cijeloj školi!

Na unutarnjoj strani letka nalazi se okvir za domaći zadatak koji je potrebno popuniti, a koji će se predstavljati u razredu. Prije popunjavanja domaćeg zadatka obratite pažnju na kriterije za razradu ideja (nalaze se unutar letka).

Kriteriji za ideju za vašu školu

Ideja koja će doprinijeti školi i u nadležnosti je škole.

Ideja koja ne utječe štetno na okoliš!

Ideja koja je za opće dobro većeg broja učenika i učenica.

Ideja koja nije vjerske, religijske ili stranačke naravi.

Ideja koja će se moći realizirati do kraja kalendarske godine.

Ideja koja ne košta više od 2.700,00 € (bez PDV-a).

Suglasnost roditelja za fotografiranje i snimanje

Suglasan/a sam da se

ime i prezime učenika/učenicke

FOTOGRAFIRA I SNIMA u školi tijekom provedbe projekta participativnog budžetiranja.

Učenike će snimati DURA, a fotografije i snimke će se koristiti isključivo za potrebe:

- informiranja javnosti o provedbi projekta participativnog budžetiranja,
- izrade grupe fotografije razreda i promotivnog videa projekta.

ime, prezime i potpis roditelja

ZA UČENICE I UČENIKE

Sudjeluj i ti!

Osmisli svoju ideju za bolji Grad.

Drage učenice i dragi učenici, pred vama je važan domaći zadatak!

Vaša je škola mjesto u kojem provodite puno vremena, mjesto u kojem učite i zabavljate se, stoga se škola trudi omogućiti vam najbolje uvjete!

Škola je odlučila sudjelovati u projektu u sklopu kojega možete predložiti ono što mislite da u školi nedostaje ili bi moglo biti bolje.

Projekt koji odaberete s učenicama/učenicima iz generacije, može vrijediti do 2.700,00 eura (bez PDV-a). S ovim financijskim sredstvima možete u svojoj školi nešto kupiti, popraviti ili organizirati.

Popunite ovaj letak vašom idejom i donesite ga sljedeći tjedan u školu, odnosno na iduću radionicu!

Predstavite svoju ideju prijateljicama i prijateljima i zajedno glasujte za ideju koja će se ostvariti!

DOMAĆI ZADATAK

Ime i prezime

Naziv škole i razred

Previdi ideju: koje bi promjene, poboljšanja tvoju školu postale ideje?

Opisi svoju ideju (što bi sve ideja sadržavala i obzirom na kriterije)

Zašto bi ideju trebalo realizirati?

Oprij pripremi: možeš koristiti koliko ti godišnje odabereš svoju ideju prijateljima i prijateljicama u razredu, kolegama, roditeljima, kamo hoćeš!

Additional webinars scheduled for March and June... stay tuned!

Have ideas of topics and speakers? Drop them in the chat!

THANK YOU!

**Hope you enjoyed the webinar,
and are excited to be part of this
community to drive climate
neutrality!**
