EU MISSION PLATFORM

CLIMATE NEUTRAL AND SMART CITIES

NetZeroCities has received funding from the H2020 Research and Innovation Programme under grant agreement n°101036519.

# WELCOME The NetZeroCities Community of Practice

EU CITIES MISSION

**Shape the future of urban sustainability  
NetZeroCities Community of Practice**

Funded by  
the European Union

EU Missions: © European Union, 2024. All rights reserved

NetZeroCities has received funding from the H2020 Research and Innovation Programme under grant agreement n°101036519.

# Community of Practice

## What is a Community of Practice?

A **community of practice (CoP)** is a space gathering **city officials, experts, and stakeholders from all sectors**—energy, mobility, circular economy, construction —to accelerate climate action. Community members engage in learning and collaborating to enhance their knowledge and skills in that area.

## Purpose

- Knowledge Sharing and learning
- Peer-to-peer exchange through engagement & collaboration
- Support for Climate Neutrality Goals

## How

Many communities of practice rely on face-to-face meetings as well as web-based collaborative environments to communicate, connect and conduct community activities.

# Social Innovation & Urban Mobility: Insights from Turku & Zaragoza

**Paula Salo**  
Professor, Division of  
Psychology, University  
of Turku

**Felipe Del Busto**  
Project leader, Sustainable  
Urbanism team, CIRCE  
Centro Tecnológico

**Sigrid Ehrmann**  
Head of Horizon Lab, EIT  
Urban Mobility

This webinar is done in collaboration with CIVITAS Initiative and the ELABORATOR project.

NetZeroCities has received funding from the H2020 Research and Innovation Programme under grant agreement n°101036519.

# Agenda

- Icebreaker & Introduction to Social Innovation (5 min)
- Presentation by EIT Urban Mobility (5 min)
- City of Turku (10 min) + Q&A (5 min)
- City of Zaragoza (10 min) + Q&A (5 min)
- Open Q&A and Discussion (20 min)

# Icebreaker & Introduction to social innovation

NetZeroCities has received funding from the H2020 Research and Innovation Programme under grant agreement n°101036519.

# What does social innovation mean to you?

- ⓘ The Slido app must be installed on every computer you're presenting from

**Are you or have you been  
involved in social innovation  
projects? What kind?**

ⓘ The Slido app must be installed on every computer you're presenting from

slido

# What is Social Innovation about?

**Social Innovation** is *not* Social Impact or Social Entrepreneurship.

...is about changing how society works.

...is about getting people to act **NOW** – changing social practices.

...is systemic.

Is about the end result (e.g. how many lives were impacted by an initiative or program).

Is about new forms of value creation based on social and economic principles. Social impact is the final goal of social enterprises and profit is essential towards guaranteeing continuous social impact.

# What is Social Innovation?

Fosters inclusive and collaborative approaches to tackling climate challenges, making solutions more effective and rooted in community needs. It is a **bottom-up, collaborative, systemic and human-centered approach to innovation**. In short, it is social in its means and its ends.

## Fostering Collective Action

Invites citizens to actively contribute to the mission through lifestyle changes, participation, entrepreneurship

## Building Active Community Structures

Creating new structures for communities to act positively for the climate and together (e.g. energy communities)

## Collective sense of agency

Creating a more collective vision to development and ways of being/living

## Inclusion and Diversity

Reflects demographic diversity and addresses the needs of underrepresented or vulnerable groups.

## Meets Social Needs and Overall Wellbeing

Innovations that satisfy "real" unmet needs of society, considering the economic development and overall wellbeing of people and planet at every step

## Increased capacity to act

Building new skills and knowledge that allow for broader participation

## Improved Policy Quality

Incorporates diverse perspectives and evidence, leading to more effective, transparent, and responsive policies.

## Creates new relationships

Engages different actors in new relationships giving space for new collaboration and further innovation and a more vibrant ecosystem

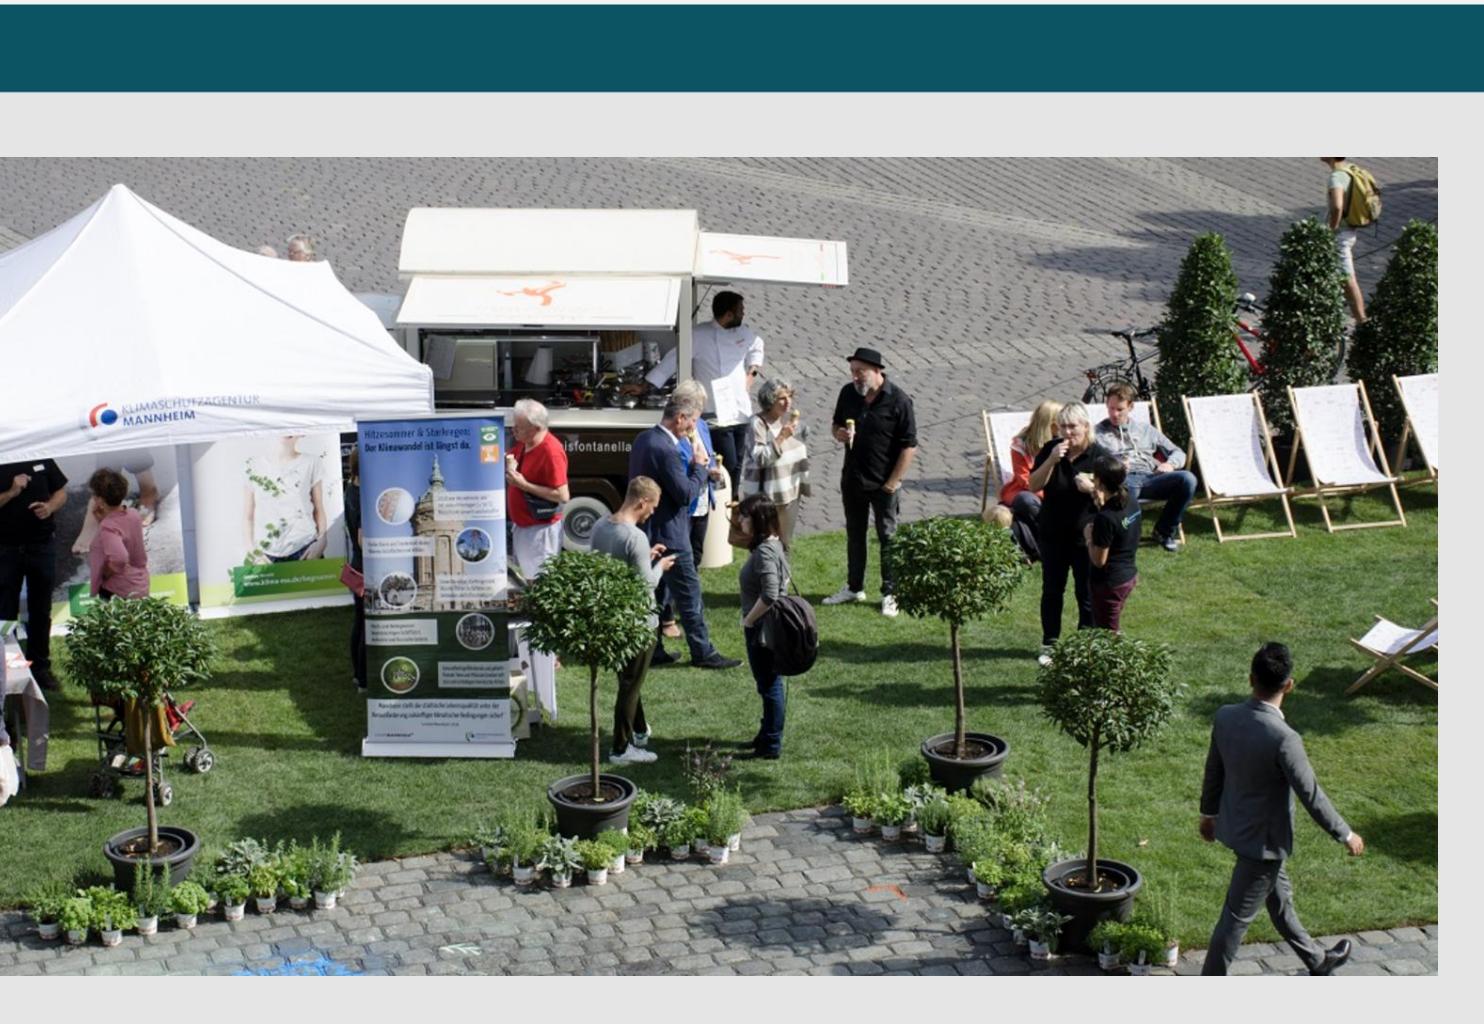

## Social Cohesion

Enhances trust in democracy and combats disinformation, fostering unity and civic engagement.

# Social Innovation is about...

... creating collective sense of agency

## City Labs

NetZeroCities has received funding from the H2020 Research and Innovation Programme under grant agreement n°101036519.

# Social Innovation is about...

... creating new relationships and increasing the capacity to act

**Municipalities as platforms for collective urban action - participatory budgeting**

... fostering collective action

## Climate Labels

The screenshot shows a website for 'Ilmastoannos' (Climate Labels). The header is orange with the logo 'Ilmastoannos' and navigation links for Home, Climate Meal Campaign 2021, News, Contact us, and Suomeksi. The main content features a large blue cloud icon with a fork and knife inside, next to the text '0,1 kg CO<sub>2</sub>e'. To the right, a section titled 'Serve climate-friendly meals to your customers' explains the campaign: 'The Climate Meal label helps restaurant customers to identify meals from the menu that have a smaller-than-average carbon footprint. In Climate Meals the total carbon footprint of all its ingredients does not exceed 1.0 kg CO<sub>2</sub>e, which is significantly less than the Finnish average. Sign up your restaurant and join the fight against climate change!' A blue button at the bottom right says 'Sign up and start serving Climate Meals →'. Logos for the European Union and the EU:ita 2014-2020 program are in the bottom right corner.

# Nudging 1.5 degree life in Turku, Finland

E-bike pilot, co-creation, and nudge playbook

Paula Salo, Professor  
Department of Psychology  
University of Turku, Finland

# What is nudge?

A nudge is any aspect of the choice architecture that alters people's behaviour in a predictable way without forbidding any options or significantly changing economic incentives.

To count as a mere nudge, the intervention must be easy and cheap to avoid.

*Thaler & Sunstein (2008)*

# E-bike pilot

- Car service customers were offered a free e-bike trial instead of a courtesy car
- A critical moment in typical car-use behavior (when one's own car is unavailable) to encourage trying a new, more sustainable mode of transport
- September – November 2024

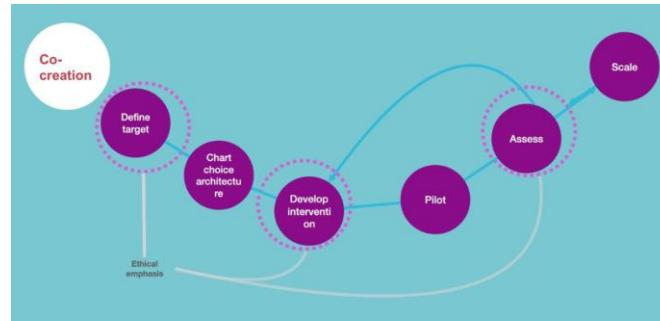

# E-bike pilot

- Top 3 reasons to choose e-bike
  1. Wanted to try out an e-bike **78%**
  2. E-bike seemed most convenient option **78%**
  3. Trial was free **44%**
- User satisfaction
  - **66%** were satisfied
  - **33%** were very satisfied
- Experiences
  - The service was popular
  - Impact evaluation is difficult
  - Unexpected outcomes – The experiment even opened up a business opportunity for a competing bike rental company

# Co-creation

## Define the problem

- What is the intervention aiming to achieve?
- What kind of behavior do you want to change, and what do you want people to do instead?
- Who is the target group?

## Understand the choice architecture

- Gather information from various sources to understand the target group's operational environment and decision-making situations.
- What are the critical decision points related to the target behavior?

## Develop the intervention options

- Understand how and why a particular measure affects behavior.
- What are the key factors influencing behavior and how to modify those?
- What ethical challenges are relevant for the intervention?

## Pilot the intervention

- Test whether intervention is affordable, easily implementable in practice, and considered meaningful and acceptable by both the target group and the implementers.
- What are recruitment and dropout rates?

## Evaluate

- Are the evaluation instruments acceptable, feasible, and reliable?
- Is it possible for the intervention to achieve the desired effects?
- By what mechanisms, on whom, and under what conditions the intervention does or does not work?

## Scale up the interventions

- Prepare a careful and comprehensive implementation planning and evaluation process
- Collaborate with the staff of the operational environments targeted by the intervention

<b>Reasons to use the service where nudging happens:</b>			<b>Reasons not use the service:</b>
<ul style="list-style-type: none"> <li>With one ticket is possible to travel to neighbour cities</li> <li>Going to the city centre is more pleasant with the bus than with the own car</li> <li>In summertime, visiting Ruissalo, an island with parks and cafes</li> </ul>			<ul style="list-style-type: none"> <li>Not knowing which are the right buses and where to get out</li> <li>How and where to download the travel card</li> <li>Weather conditions make walking to the bus stop dangerous</li> <li>Distance from home to the bus stop is too long</li> <li>Changing the bus feels uncomfortable</li> <li>If using the bus requires using app or internet</li> </ul>

43

## Nudge concept

Problem statement	Target behaviour	Behavioural barriers
Define the problem you aim to influence	What and who's behaviour you aim to nudge	What obstacles prevent the target behaviour
<b>Service:</b> Gamified lesson for elementary school: Engagement to traveling with local bus and learning the traveling practices.	<b>Problem statement</b> The aim is to provide schoolchildren (10-11 years old) with information about using the bus and sustainable mobility.	<b>Target behaviour</b> What and who's behaviour you aim to nudge
	<ul style="list-style-type: none"> <li>However, things learned are forgotten if they are not reviewed, so 4th graders in elementary school need review.</li> <li>In the background, we have the fact that people often travel to school by car, even though the journey could easily be made by bus, on foot or by bike.</li> </ul>	<b>Behavioural barriers</b> What obstacles prevent the target behaviour
	<b>Nudge mechanism</b> What behavioural ideas is the nudge based on	<b>Problem statement</b> The game's players and teachers are informed about what the game encourages, so it is transparent.
		<ul style="list-style-type: none"> <li>Teachers: Gamification helps to highlight the benefits of public transport and good travel practices. The game is designed to be as equal and accessible as possible.</li> <li>Information security issues are taken into account when planning the tasks.</li> <li>The game is designed to be transparent and easy to use from the approved educational content for comprehensive schools in terms of social acceptability.</li> <li>Playing the game is voluntary, and the class teacher decides whether to play based on his or her own professional skills.</li> <li>During the game's design phase, the game is tested with teachers and students, so it supports user-centricity.</li> </ul>
	<b>Ethics</b> Is the nudge ethical and transparent	<b>Target behaviour</b> What and who's behaviour you aim to nudge
		<b>Behavioural barriers</b> What obstacles prevent the target behaviour
		<b>Problem statement</b> Success is recognized by the fact that people want to play the game, find it interesting and useful. In addition, the willingness of players and possibly their families to use public transportation improves.
		<ul style="list-style-type: none"> <li>Success is measured by the number of players, which indicates teacher approval.</li> <li>At the end of the game, players are asked for feedback on their gaming experience in a child-oriented manner.</li> </ul>

the European Union

# SUSTAINABLE MOBILITY

# Designing sustainable urban mobility towards climate-neutral cities

# Ambition

Holistically plan and deploy innovations to foster urban mobility in our cities  
that are **safe, inclusive and sustainable**

**Co-create** measures with different stakeholders to ensure no one is left  
behind in our mission towards **climate neutrality**

Demonstrate the innovations in diverse **European cities** with the definition  
and application of a **twinning methodology**

# Approach

## 6 Lighthouse cities will pilot key interventions.

They will be specifically co-designed and co-created with identified vulnerable to exclusion user groups, local authorities and other relevant stakeholders.

## 6 Follower cities will learn and exchange with the Lighthouse cities to plan and implement their own sustainable solutions.

## CIVITAS

### Sustainable and Smart Mobility for All

- A flagship initiative of the European Commission implementing projects to achieve ambitious mobility goals
- A network of 380+ local authorities committed to sustainable urban mobility

#### It does...

- Monitor, extract, and communicate project results
- Disseminate the state of the art of urban mobility
- Enhance operational structures
- Improve collaboration groups
- Guarantee innovation replication via deployment planning
- Promote solution-specific learning and skills development

#### It does *not*...

- Fund or implement mobility measures on-the-ground
