

# Blue Ecosystem for the Dual Transition

## Almería - Spain

### Short description

The city of Almería is signing this Local Green Deal to implement its local strategy from the Almería Strategic Plan and Urban Agenda, accelerating sustainability action aligned with the European Green Deal. It aims to boost and promote the blue economy sector, which encompasses economic activities linked to the seas and coast as drivers of socio-economic dynamism. This LGD focuses on developing the blue economy within the double green and digital transition, contributing to the city's strategic sustainability frameworks. The blue economy generates wealth, employment, and new opportunities for coastal cities.

### Industry/Sector

- Tourism

The LGD focuses on the broader blue economy sector, including fishing, aquaculture, shipbuilding, maritime transport, desalination, marine crops, and ports, but lists specific actions under the Tourism sector

### Parties of LGD/Participating parties

- Almería City Council
- Andalusian Marine Maritime Cluster of Andalusia (CMMA)

# Blue Municipalities for the Dual Transition in Almería

## Almería - Spain

### Short description

The city of Almeria is signing this LGD to implement its local strategy from the Almeria Strategic Plan and Urban Agenda Action Plan, accelerating local sustainability action in line with the European Green Deal. This LGD focuses on characterising blue municipalities and their development within the dual green and digital transition. It involves raising awareness about the blue economy, locating climate change risks, focusing on measurement and data using digitalisation, and proposing solutions. The LGD promotes awareness, training, economic development, and business innovation to foster blue growth and the sustainable urban environment of blue municipalities.

### Industry/Sector

- Tourism
- Construction & Built Environment

### Parties of LGD/Participating parties

- Almeria City Council
- EVENTISIMO S.L.U

## Scope of LGD

The LGD defines the contributions of Almeria City Council and EVENTISIMO S.L.U. to accelerate sustainability action at the local level in line with the European Green Deal. Its scope is "Blue Municipalities for the Dual Transition", aiming to characterise and develop blue municipalities within the dual green and digital transition. This involves promoting the blue economy and the sustainable urban environment through awareness, risk location, data, and solutions.

## Concrete measures/commitments

- Almeria City Council commits to playing a key role in boosting and promoting the blue economy sector and its development within the double green and digital transition.
- EVENTISIMO S.L.U. commits to actively contributing to sustainability by implementing innovative strategies supporting the blue economy and the digital transition.
- EVENTISIMO S.L.U. commits to providing expertise in events, communication, and digitalisation to develop and execute strategies for driving the blue economy in Almeria.
- EVENTISIMO S.L.U. commits to promoting the Blue Economy through event organisation, boosting innovation and digitalisation, and raising awareness and training.
- EVENTISIMO S.L.U. commits to organising international events and forums (like Sun&Blue), developing communication and awareness strategies, and promoting public-private partnerships.
- The City Council and EVENTISIMO S.L.U. commit to working on initiatives, including promoting training, coordination, and collective action around blue municipalities; localising formulas to boost emerging and consolidated blue economy sectors; and cooperating in strategic alliances and project promotion.

# Boosting Blue Economy for the Double Transition in Almería

## Almería - Spain

### Short description

This LGD is a strategic governance approach used by Almería City Council to accelerate local sustainability action, aligning with the European Green Deal and Urban Agenda Almería 2030 to reach its goals. It focuses on boosting and promoting the blue economy sector and its development within the green and digital dual transition. The blue economy encompasses sectors linked to the seas and coast as drivers of socio-economic dynamism. The LGD contributes to implementing the city's sustainability strategic frameworks by enhancing the blue economy sector

### Industry/Sector

- Tourism
- Construction & Built Environment

### Parties of LGD/Participating parties

- City of Almería (Local Government)
- University of Almería

## Scope of LGD

The LGD defines the contributions of the City of Almeria and the University of Almeria to accelerate sustainability action, aligning with the European Green Deal and Urban Agenda Almería 2030. Its scope is "Boosting Blue Economy for the Double Transition", aiming to boost and promote the Almería blue economy sector within the green and digital dual transition. It also includes actions related to the Blue and Urban Digital Transition and Biodiversity, and Ecological Connectivity.

## Concrete measures/commitments

- Almeria City Council commits to playing a key role in developing the LGD by driving and promoting the Almeria blue economy sector and its development within the green and digital dual transition.
- University of Almeria, through the Vice-Chancellor's Office for Scientific Policy, commits to supporting the achievement of tasks/milestones in Blue and Urban Digital Transition, Boosting the Blue Economy for the Double Transition, and Biodiversity and Ecological Connectivity for the Double Transition.
- The City Council and the University of Almería commit to collaborating on initiatives including creating a permanent working group on Blue Digital Transition, promoting technological innovation in local management, designing the Digital Urban Agenda and Open Data Observatory, and developing a Corporate Geographic Information System (GIS).
- The City Council and the University of Almería commit to collaborating on initiatives including analysing the impact of climate change on the blue economy, developing a climate risk inventory, identifying strategies for promoting blue economy sectors, promoting climate change-adapted aquaculture and marine farming, developing indicators for measuring blue economy results, and evaluating the state of Biodiversity and Green Spaces.

# Sustainable Construction and Built Environment in Almeria

## Almería - Spain

### Short description

The city of Almería uses this LGD as a strategic governance approach to implement its local strategy from the Almería Strategic Plan and Urban Agenda, accelerating sustainability action in line with the European Green Deal. It focuses on the Construction Sector as a key area for building a more sustainable economic model towards a climate-neutral horizon by 2050. The LGD aims to encourage sustainable materials, reduce the carbon footprint in buildings and urban development works, and train professionals and entrepreneurs in sustainability. This contributes to creating a future Almeria that is more sustainable, green, resilient, and has a higher quality of life.

### Industry/Sector

- Construction & Built Environment

### Parties of LGD/Participating parties

- City of Almeria (Local Government)
- The Andalusia Division of the Professional Association of Chartered Civil Engineers (CICCP)

## Scope of LGD

The LGD defines the contributions of the signatory parties to implement Almeria's strategy and accelerate sustainability action at the local level aligned with the European Green Deal. Its scope is Sustainable Construction and Built Environment in Almeria, addressing climate change by focusing on the construction sector to achieve a climate-neutral horizon by 2050. Measures include encouraging sustainable materials, reducing carbon footprint, and training professionals.

## Concrete measures/commitments

- Almeria Local Government commits to fostering the development of training in professional bodies and developing and sharing successful case studies.
- The Andalusia Division of the Professional Association of Chartered Civil Engineers (CICCP) commits to playing a key role by carrying out training and dissemination tasks among its professional members.
- CICCP commits to collaborating with public entities and administrations to provide specialised technical knowledge on sustainable construction.
- The local government of Almería and CICCP commit to promoting awareness, training, economic development, and business innovation around sustainable construction and built environment.
- The local government of Almería and CICCP commit to celebrating seminars, courses, and workshops on sustainable construction, elaborating a catalogue of sustainable elements and materials, and creating handbooks, guides, or educational material about specific subjects

# Sustainable Construction and Environment in Almería

## Almería - Spain

### Short description

Almería uses this LGD as a strategic governance approach to accelerate local sustainability action, aligning its Strategic Plan and Urban Agenda with the European Green Deal. This LGD targets the Construction Sector, identified as a key area for achieving a climate-neutral horizon by 2050. It aims to encourage the use of sustainable materials, reduce carbon footprint in buildings, and train professionals in sustainability. The LGD contributes to building a future Almería that is more sustainable, green, resilient, and has a higher quality of life.

### Industry/Sector

- Construction & Built Environment
